US#1 - Create Task

As a ToDo App user
I should be able to create a task
So I can manage my tasks

Acceptance Criteria:

- The user should always see the 'My Tasks' link on the NavBar
  - Clicking this link will redirect the user to a page with all the created tasks so far
- The user should see a message on the top part saying that list belongs to the logged user:
  - eg.: If the logged user name is John, then the displayed message should be **'Hey John, this is your todo list for today:'**
- The user should be able to enter a new task by hitting enter or clicking on the add task button.
- The task should require at least three characters so the user can enter it.
- The task can't have more than 250 characters.
- When added, the task should be appended on the list of created tasks.
